

Voting and GDRC Results

Feb 25, 2010

Voting on the two drill sites is now complete. There were 462 votes submitted.

439 (95%) were FOR both drill sites

24 (5%) were AGAINST

Chesapeake's application for drilling at the Valkyrie Padsite (West Cleburne Road and McCart Street) went before the City's Gas Drilling Review Committee (GDRC) February 25.

We presented the results of our voting to the committee as well as the concessions for drilling conditions that we negotiated with Chesapeake.

Although four people spoke against the drill site, it appeared that the process went well for us. This committee does not take a vote as such.

They will present their information and concerns to the City Council and will also post their concerns on the City Website, www.fortworthgov.org within two weeks (March 11).

The application for the Pear Padsite is expected to go before the GDRC on March 25.
